Employer	LG Chem Inc.	Employment type	Regular
Work type	On-site	Working hours	08:30 ~ 17:30 (Mon to Fri)

Job Description

Job Summary

"We connect science to life for a better future."

LG Chem - Leading the Chemical Industry in Korea (<http://www.lgchem.com>)

LG Chem endeavors to become a 'Global Top 5 Chemical Company' with a balanced business portfolio that has a competitive advantage across the globe, including business divisions in petrochemicals, advanced materials, life sciences, and a subsidiary specializing in batteries.

LG Chem contributes to industrial development with various petrochemical products of the world-class quality. In the petrochemicals business, the company has built a vertically integrated system from the basic raw materials (the upstream) such as ethylene and propylene to the downstream products such as PE, ABS, Acrylic Acid and synthetic rubber. The petrochemicals business is LG Chem's core business area with the world-class productivity and cost competitiveness. The company has advanced its business structure by focusing on the high-value added products such as Nano-carbon tube, strengthening its competitiveness in the global market consistently.

To expand our global business and secure a broad supply chain of raw material, we are planning to discover new naphtha supplier in the Middle East and India.

For this reason, We would like to invite applicants with enthusiasm and high understanding of Middle East and Indian culture as LG Chem's family.

As a Naphtha Buyer, you will be responsible for purchasing and supplying of Naphtha, which is the raw material for petrochemical processes.

You will be expected to stay up-to-date on the latest market trends including but not only limited to global naphtha supply, international crude oil prices, major oil-producing countries to provide insightful strategic recommendations for business strategy. Please refer to page 2 for the details on the position.

Kangsan Lee
