In coming summer, UNESCO International Center for Water Security and Sustainable Management (i-WSSM) and Korea Institute of Geoscience and Mineral Resources (KIGAM) will launch a special program for international students in water-related field.

If you are interested in groundwater, which is the most arising issue in the field of water-security, along with the natural heritages in Korea, please apply to join our program! This program will provide you a fruitful groundwater management knowledge and meaningful cultural experiences.

### Program Theme
